Should I buy an inverter generator?

In turn, you generally want to invest in an inverter generator if you plan to power any sensitive electronics. One potential exception if these sensitive electronics do not need that much power. In that case, you could get a small inverter and use the rest of the available power to run your other devices that can deal with higher THD levels.

Do I need a separate inverter generator?

Even just a small one could help you power a few weaker electronics. You can then still use the rest of the high THD power to run devices like a sump pump or well pump that can typically deal with this non-inverter electricity. However, if you already have an inverter generator, you don’t need a separate inverter too.
