

# 10 000 kWh of energy storage equipment

## Overview

---

How much does energy storage cost?

Let's explore the costs of energy storage in more detail. Although energy storage systems seem attractive, their high costs prevent many businesses from purchasing and installing them. On average, a lithium ion battery system will cost approximately \$130/kWh.

What is the current cost of storing energy per kWh?

The current cost of storing energy per kWh is \$1000 / kWh. Additionally, by using the to pump water in the water tank.

What is the best way to store large amounts of electricity?

Schedule a time to speak with one of our energy experts. The best way to store large amounts of electricity depends on various factors including the specific application, cost, and efficiency goals. Popular methods include pumped hydro storage, battery storage, and thermal energy storage.

What is the 100 MW energy storage system?

The 100 MW system is an energy storage installation that will provide critical capacity to meet local reliability needs in the area, while helping California meet its environmental goals.
