

100kWh of collapsible containers used in Malaysian ports

Overview

Which container terminals in Malaysia have the highest volume handled?

The prominent container terminals in Malaysia such as Port Klang and Port of Tanjung Pelepas are positioned among the top twenty ports in terms of volume handled. The annual average growth of throughputs in Malaysian container ports increased more than three-fold from the year 2000 to 2010.

What are the major container ports in Malaysia?

Port Klang, Penang Port, PTP, Kuantan Port and Johor Port, being the major container seaports in Malaysia have shown an increasing trend in container trade volume and number of vessel arrivals over the years (Soon and Lam, 2013). These container ports represent the northern, central and southern region in the Malaysian peninsular.

How much cargo is containerized in Malaysia?

About 70% of the cargo is containerized. With a total throughput of 24.9 million TEUs in 2018, Malaysian ports handled almost as many containers as the ports of Rotterdam and Antwerp combined.

Why is Malaysia a good place to move container boxes?

Malaysia, situated between East and West, is an interface in world maritime trade, playing a crucial role in the business of moving container boxes in South-eastern parts of Asia. The prominent container terminals in Malaysia such as Port Klang and Port of Tanjung Pelepas are positioned among the top twenty ports in terms of volume handled.
