Overview

Can a 30kW Solar System pay for itself?

You can sell excess energy to your utility: it is called net metering and it's the main way in which a 30 kwh solar system pays for itself. While off-grid commercial systems of such a scale are a rarity, a 30kw solar system with battery storage can be a good choice if you want to have a hybrid system.

Why should you buy a 30kW Solar System?

1. The energy consumption of your building ends up as a burden on the budget. A 30 kw solar system helps to alleviate it, if not cover the needs for electricity completely. 2. Solar panels eventually pay for themselves. Payback time depends on the policies in the state and electricity prices, as well on your 30kw solar system price.

How long does a 30kW Solar System last?

Payback time depends on the policies in the state and electricity prices, as well on your 30kw solar system price. On average panels pay for themselves in 7-8 years in the USA. The average lifespan of solar panels exceeds 25 years, so you can treat them as a reliable and smart investment. 3. Solar improves the public image of your business.

How does a 30 kWh solar system work?

The PV installations of a large scale are generally grid-tie which means that your house/cafe/gas station or whatever else is connected to the power grid but you use solar energy simultaneously. You can sell excess energy to your utility: it is called net metering and it's the main way in which a 30 kwh solar system pays for itself.
