

30kva sine wave inverter

Overview

What is a 3000-watt pure sine wave inverter?

A 3000-watt pure sine wave inverter is a device that converts DC current to AC current in the form of a pure sine wave, with a maximum output power of 3000 watts. It is typically used to power appliances from solar panels or batteries.

What is a sinewave inverter?

A sinewave inverter is a device that converts DC power (such as from batteries or accumulators) into alternating current (typically 220 volts 50 Hz sine or corrected). In simpler terms, it converts direct current into alternating current. Our common emergency power supply often uses a DC battery to produce 220V AC through the use of a sinewave inverter.

What are the features of T Series solar inverter?

T series 30kw~200kw three phase solar inverter feature: 1. With AC reactor (Protect against city power current shock) 2. Double protection. (Two fuses, including the city power security and battery power security) 3. Thyristor charging.
