

3c tool battery

Overview

What is the power delivery of a 3C battery?

A 2000mAh 3C battery can safely deliver up to 6A of current. These batteries are critical for high-power devices like drones, RC cars, and power tools, balancing energy density and performance.

What are 3C batteries used for?

3C batteries are used to power devices that require rapid energy output or sustained torque, such as drones for quick ascents, RC cars for high-speed acceleration, and cordless power tools. They are also used in emergency lighting, medical equipment, and portable electronics where reliability under high load is crucial.

What is a 3C lithium battery?

3C lithium battery comes with high energy density, high-speed charging, and good power supply. This battery is made to fulfill the demand for different electronic devices and provide a good power supply. These batteries have a good working life, so they handle charge and discharge cycles without affecting performance.

What is a 3C 5C battery used for?

3C-5C: Suitable for high-drain devices like drones or power tools. 10C and beyond: Used in high-performance applications like racing drones or industrial machinery. What is a High-Rate Discharge Battery?
