

4 2v solar container lithium battery pack production

Overview

What are the different types of lithium ion batteries?

According to the different cathode materials, lithium-ion batteries are mainly divided into lithium cobalt acid batteries, lithium manganese acid batteries, lithium nickel acid batteries, lithium iron phosphate batteries, lithium ternary batteries and so on.

What is battery pack of chisage ESS?

The energy storage battery Pack process is a key part of manufacturing, which directly affects the performance, life, safety, and other aspects of the battery. What kind of trials and tribulations has battery pack of Chisage ESS gone through?

Let's find out. If playback doesn't begin shortly, try restarting your device.

What are battery cells made of?

Our battery cells are all made of new A-grade cells, with a single cell voltage of 3.2V, and the current production of battery Pack capacity is mainly 100Ah, 200Ah, and 280Ah. Use steel belts for pressing and packing, form 8 cells into 1 Module module, 2 Module modules into 1 Box Pack, and dissipate heat through ducts and fans.

What is the production process for chisage ESS battery packs?

The production process for Chisage ESS Battery Packs consists of eight main steps: cell sorting, module stacking, code pasting and scanning, laser cleaning, laser welding, pack assembly, pack testing, and packaging for storage. Now, following in the footsteps of Chisage ESS, our sales engineers are ready to take you on a virtual tour!
