

# 45W solar panel configuration

## Overview

---

What is a 45 watt solar panel?

The Thunderbolt Solar Kit consists of three 15 watt solar panels, making it a 45 watt solar panel kit. It operates on 12 volt DC and comes with a frame for mounting the panels to get the 45 watt solar modules in operation.

What is a Nanopower tsp-45w solar array?

Overview The NanoPower TSP-45W is a deployable solar array consisting of three panels, each having a 2x3U form factor which makes it integrable on the GomSpace 6U or larger structures. As part of the NanoPower TSP-45W, the SADA-50 enables the sun tracking motion of the solar panels along one body axis.

What is a Nanopower tsp-45w sada-50?

As part of the NanoPower TSP-45W, the SADA-50 enables the sun tracking motion of the solar panels along one body axis. The overall form factor of the product allows two NanoPower TSP-45W products to be mounted on a GomSpace Structure as illustrated in Figure 2-1 on a 6U structure, as an example.

How many solar cells are in a wing?

While stowed the wing has outwards pointing cells for power production. Each panel holds 15 triple junction solar cells allowing up to 45W power production per wing in nominal conditions (refer to CESI CTJ-LC/SCA-8040 cell datasheet for temperature and aging effect on power generation). HDRM: Release Control PCBs and mechanical release devices.
