

50kW South American photovoltaic folding container for wastewater treatment plants

Overview

Are solar photocatalytic wastewater treatment plants environmentally friendly?

There do exist very few medium scale solar photocatalytic wastewater treatment plants which are environment friendly compared to the existing conventional systems. Treatment of wastewater using solar energy reduces the use of conventional power there by reduces emission of GHG.

What are the solar power utilization scenarios of PV & WWTP projects?

Summary of various solar power utilization scenarios of PV + WWTP projects. Leveraging electricity for hydrogen production via photovoltaic-electrochemical water splitting is another potential utilization scenario [59, 60]. The effluent of WWTPs provides a vast volume of water and oxygen can be simultaneously produced.

How does LZY's photovoltaic power plant work?

LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly.

Can solar photocatalysis be used for disinfection of dairy wastewater effluent?

This pair enable chemical renovation of the reactant and rejuvenate into its chemical mixture (Park, 2017). Solar photocatalysis, solar photolysis, concentrated solar photocatalysis/photolysis process along with titanium dioxide as catalyst were experimentally investigated for disinfection of dairy wastewater effluent (Afsharnia et al., 2018).
