

5MWh Off-Grid Solar Container Used in Mountainous Areas

Overview

Which solar panels do you use?

We use the highest quality solar panels, including LG, Peimar, and Canadian Solar; these solar panels harvest the sun's power and stores the energy in high-quality lithium batteries, controlled with an external BMS. Then the power is distributed using Victron Multiplus units, so this inverter/charger can transfer the power.

Where is harvested energy stored?

Harvested energy is stored in Lithium LiFePO4 battery banks with it's own programmed BMS (Battery Management System).

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.
