

5kw solar system with battery in Australia

Overview

What is a 5kwh solar battery?

A 5kWh solar battery keeps up to 5 kilowatt-hours of electricity—typically enough to run vital devices like your fridge, lights, internet router, and maybe a load of laundry after sunset. Across Australia, where solar adoption is rising rapidly, more homes are turning to these smaller-sized batteries for both cost savings and energy independence.

How much does a 5kw Solar System cost in Australia?

As per the Solar Choice Price Index, the typical expense for a 5kW solar system in Australia, as of July 2023, stands at approximately \$1.13 per watt, equating to around \$5,640, and the yearly saving is \$1,947. Now a days, the payback period will be about 3-4 years.

Why is a 5kw solar system so popular in Australia?

The 5kW solar system is extremely popular for the average Australian household (using around 25kWh of power daily) because it provides an outstanding ROI (return of investment). The high rates of power production easily balance out the relatively low cost of installation.

How much does a 5kw Solar System cost?

For a good quality 5kW solar system, you're likely to pay between \$5,000 - \$8,000. The cost of a 5kW system is impacted by three major price variables: The table below shows the average price of a 5kW system in major capital cities: The prices above include the full cost of installation, GST and all associated components.
