

# **7 4v solar container lithium battery pack standard**

## Overview

---

What is a 7.4 volt battery?

Part 1. What is a 7.4 V battery?

A 7.4V battery is a rechargeable lithium-based power source, typically configured as a 2-cell (2S) lithium polymer (LiPo) or lithium-ion (Li-ion) pack, with each cell providing a nominal voltage of 3.7V, totaling 7.4V when combined in series.

What is a standard lithium battery pack?

Standard lithium battery packs, including a wide range of size options and different series-parallel combinations of cells. These have good compatibility and adaptability and have passed the global safety certification. Our standard battery packs are used and validated in multiple professional fields.

What is a 7.4v Li-ion battery?

A 7.4V Li-ion battery is also a rechargeable battery that uses lithium-ion chemistry. Li-ion batteries are similar to LiPo in voltage and capacity but have a more rigid, cylindrical shape. The 7.4V nominal voltage is typically achieved by connecting two 3.7V Li-ion cells in series.

What is a 7.4v LiPo battery?

A 7.4V LiPo battery is a specific type of rechargeable battery that uses lithium-polymer chemistry. LiPo batteries are known for their high energy density, compact size, and flexibility in shape. The 7.4V nominal voltage is typically achieved by connecting two 3.7V LiPo cells in series.

## 7 4v solar container lithium battery pack standard
