

# **Abu Dhabi solar container communication station inverter grid connection application information**

## Overview

---

How many service stations will solar panels be installed in Abu Dhabi?

- Solar PV panels will be added to more than 100 service stations across Abu Dhabi, intended to avoid more than 13,000 tonnes of CO2 emissions annually.
- Milestone marks the second phase of service station solarization program following the successful installation of PV solar panels at 28 service stations in Dubai.

Will emerge bring solar energy to Abu Dhabi service stations?

Eng. Bader Saeed Al Lamki, CEO of ADNOC Distribution, said: “We are pleased to partner with Emerge to bring solar energy to our Abu Dhabi service stations, building on the successful solarization of our Dubai network last year.

Will ADNOC install solar panels in Abu Dhabi?

During Phase 2, ADNOC Distribution and Emerge will install solar panels to more than 100 service stations across Abu Dhabi. The solar panels are expected to generate nearly 30,000 MWh of renewable energy per year, enough to power nearly one billion smartphones and avoid the equivalent of over 13,000 tonnes of carbon emissions annually.

Can grid-connected PV inverters improve utility grid stability?

Grid-connected PV inverters have traditionally been thought as active power sources with an emphasis on maximizing power extraction from the PV modules. While maximizing power transfer remains a top priority, utility grid stability is now widely acknowledged to benefit from several auxiliary services that grid-connected PV inverters may offer.

## Abu Dhabi solar container communication station inverter grid connection
