## Overview

---

Why is Saudi Arabia interested in solar energy?

Saudi Arabia, the epicenter of global oil industry, has been showing keen interest in solar energy in recent years. Saudi Arabia has one of the world's highest solar irradiation in the world, estimated at approximately 2,200 thermal kWh of solar radiation per m<sup>2</sup>.

Are solar energy systems economically feasible in Saudi Arabia?

These methods are economically feasible. By employing PV energy systems in these methods of agriculture Saudi Arabia can achieve sustainability in food, water, and energy. These modern agricultural methods will create jobs for locals in rural and urban areas.

Does Saudi Arabia need a photovoltaic energy system?

Saudi Arabia is the largest country in the Middle East with huge solar energy resources but has achieved minimal adoption of photovoltaic energy systems (PV). This study investigates the potential of PV systems to address pressing challenges, including water scarcity and agricultural unemployment.

Does climate affect solar energy performance in Saudi Arabia?

The study in Ref. emphasises the abundant solar energy potential in NEOM city, Saudi Arabia, with an average Global Horizontal Irradiance of 6.43 kWh/m<sup>2</sup> per day. Fig. 7. Yearly mean of direct normal irradiance in Saudi Arabia . 3.3. Impact of harsh climate on PV energy performance
