

# Alexandria Solar System Egypt

## Overview

---

Can solar energy save electricity in Egypt?

Furthermore, economic saving are encouraged and could be observed after a long period. Based on the potential of solar energy in Egypt, the natural lighting system can work efficiently for around 12 h per day, and thus electricity bill savings of up to 58% could be achieved with optimum lighting levels.

Can natural lighting save electricity in Egypt?

Based on the potential of solar energy in Egypt, the natural lighting system can work efficiently for around 12 h per day, and thus electricity bill savings of up to 58% could be achieved with optimum lighting levels. In this way, photocontrolled lighting systems could be included to save light energy.

What is the climate like in Alexandria Egypt?

Alexandria in Egypt is at 31°10'N latitude and 29°56'E longitude. Alexandria has a subtropical desert, low-latitude, arid, hot climate (Köppen-Geiger classification: BWh). On average, there are 3594 h of sunshine per year. In July, August and September, the warmest average maximum temperature is 30 °C (86°F).

Can natural daylight be used in Alexandria Library?

Conclusions The exploitation of the natural daylight in Alexandria Library has been considered as a case study. For this purpose, several alternatives based on solar energy have been proposed, all of which have positive effects with minimum changes.
