

# Angola Silicon Solar Panel System

## Overview

---

Will Angola have a solar panel industry?

The agreement paves the way for, within a few years, Angola to have a solar panel industry based on the exploration of quartz, as well as the production of metallurgical silicon and polysilicon, to produce solar panels.

Will Angola be able to develop a solar power plant?

The plant is expected to have an annual capacity of 180,000 tonnes of metallurgical silicon and 150,000 tonnes of polysilicon, with an initial capacity of 50,000 tonnes, it was said. This initiative not only creates new economic growth for Angola, but also paves the way for a solar panel industry based on quartz exploration in the country.

Will Angola have a solar panel industry based on quartz mining?

Sonangol said that the agreement paves the way for Angola to have a solar panel industry based on quartz mining, as well as the production of metallurgical silicon and polysilicon, for the production of solar panels, within a few years.

What is a polysilicon plant in Angola?

The National Petroleum Company of Angola (Sonangol) has entered into a memorandum of understanding with China's Qinghai Lihao Clean Energy to establish a polysilicon plant in Angola. The project, centered on quartz mining, will produce metallurgical silicon and polysilicon for photovoltaic (PV) module manufacturing.
