

# Assembly of generator sets for the solar power station in Somaliland

## Overview

---

### How to plan a solar energy project in Somalia?

When planning and implementing solar projects in Somalia, it is essential to consider these factors and their potential impact on the project's success. To ensure the success of a solar energy project from an economic point of view, it is essential to evaluate its financial viability and reliability beforehand.

### Can solar energy be used in Somalia?

In a real case study, a solar photovoltaic system in Somalia achieved a performance ratio of 70.8%. Recommendations have been provided to increase the utilization of solar energy in Somalia. Based on the extensive review conducted by the authors, no previous study has been performed on the solar energy potential in Somalia.

### How ESPs & MoEWR are transforming the energy sector in Somalia?

The ESPs and the MoEWR have also planned to increase electricity generation through solar energy, which can benefit the infrastructures in the energy sector and the environment. The BECO is Somalia's most prominent electricity provider, mainly covering Mogadishu (80%), the airport (100%), and Halane zone, Hirshabele, Jubaland, and Southwest.

### Can Somalia harness solar energy?

This study explores Somalia's energy profile and the potential for harnessing solar energy. The installed photovoltaic capacity was found to be 41 MW and contributed 11.9% of the total electricity generation. A case study on a solar power microgrid system in Bacadweyene, Somalia, is also presented.
