

# **Australia s telecommunications base station electricity fee standards**

## Overview

---

What is the NSW telecommunications facilities guideline including broadband?

The NSW Telecommunications Facilities Guideline Including Broadband supports the roll out of broadband in NSW and aims to ensure that both wireline and wireless telecommunications infrastructure, including for broadband, can be provided in an efficient and cost effective manner to meet community needs for telecommunications services.

Who approves a mobile phone base station?

There are rules and standards telcos must follow to install mobile phone base stations. The decision on who approves a base station depends on several planning factors, including: the classification/zoning of the land.

Are NBN base stations the same as mobile phone towers?

The rules for these facilities are in Schedule 3 of the Telecommunications Act 1997 and the Telecommunications Code of Practice 2021. NBN base stations are not the same as mobile phone towers. The rules on mobile phone towers do not apply to the NBN. NBN base stations use radiofrequency electromagnetic energy (EME).

What are the AEMC's obligations under the National Electricity Rules?

View historical guidelines and standards. The AEMC and the Reliability Panel have obligations under the National Electricity Rules to make determinations, guidelines, standards and settings on a range of matters. The AEMC has obligations for:

## Australia s telecommunications base station electricity fee standard
