

# **Australian solar container lithium battery container manufacturing plant**

## Overview

---

On October 29, 2024, eLumina officially opened Australia's first factory capable of producing community lithium batteries and EV chargers. Where is Australia's first lithium battery factory located?

On October 29, 2024, eLumina officially opened Australia's first factory capable of producing community lithium batteries and EV chargers. Located in Yatala on the Gold Coast, the US\$20 million Manufacturing and Development Centre marks a significant step toward Australia's energy transition while creating up to 300 local jobs.

Why is Australia a leading supplier of lithium batteries?

As the country transitions to more sustainable energy sources, these lithium battery manufacturers provide innovative storage solutions for electric vehicles (EVs), solar energy systems, and more. Australia's position as a global leader in lithium production makes it a key player in the worldwide supply chain for lithium batteries.

Who are the top lithium battery manufacturers in Australia for 2025?

Explore the top lithium battery manufacturers in Australia for 2025, including Tesla and MANLY Battery. Learn how they are shaping the future of energy storage.

Where is Australia's first lithium foil manufacturing facility?

Queensland lithium-sulphur battery company Li-S Energy has capped the official opening of a 2 MWh cell production line in Victoria by announcing it has secured a \$1.7 million federal government grant to develop Australia's first lithium foil manufacturing facility.
