

BESS East Asia Uninterruptible Power Supply Vehicle

Overview

March 26, 2025 - Toyota Motor Corporation (TMC), Toyota Motor Asia (TMA), and Siam Cement Group (SCG), in collaboration with partner companies including Toyota Tsusho Corporation (TTC), have commenced a demonstration project for a stationary Battery Energy Storage System (BESS) utilizing vehicle batteries. What is a battery energy storage system (BESS) in Singapore?

Singapore's new BESS will help mitigate the solar intermittency caused by changing weather conditions in the region's tropical climate. Because wind and solar resources aren't constantly available and predictable, they're referred to as intermittent energy resources. What Is a Battery Energy Storage System (BESS)?

Is BESS a pillar of Southeast Asia's Energy and industrial future?

Regional initiatives such as ENABLE, the ASEAN Power Grid Advancement Program (AIMS III), and the ASEAN Battery Technology Collaboration are further reinforcing these drivers. Collectively, they position BESS not as an optional upgrade, but as an essential pillar of Southeast Asia's energy and industrial future for the coming decade.

What is BESS & how does it work in ASEAN?

Typical BESS components include battery modules, a storage enclosure with thermal management, a power conversion system (PCS), a battery management system (BMS) and an energy management system (EMS). A few other ASEAN countries are also starting to wake up to the advantages of BESS in their respective energy sectors. But, it's a slow start.

What is a battery energy storage system (BESS)?

He is the Chief Marketing Officer (CMO) for US-based lithium-sulfur EV battery start-up Bemp Research Corp. A battery energy storage system (BESS) is a power station that uses batteries to store excess energy. It is necessary for

power supply.
