

# **BESS Uninterruptible Power Supply in Columbia**

## Overview

---

Should you buy a ups or a Bess system?

UPS systems are cheaper upfront. But their batteries wear out faster and aren't designed for daily use. BESS systems are more expensive initially, but they offer long-term savings through energy arbitrage, grid incentives, and durability (especially with lithium iron phosphate batteries). Which One Should You Choose?

.

What is the difference between Bess and ups?

They use UPS for surge protection and instant switchovers and BESS to run for 8+ hours during blackouts, powered by solar. The company uses BESS to flatten peak loads and reduce utility bills by 25%, while UPS protects conveyor belts from sudden shutdowns. UPS and BESS both play critical roles, but in different ways.

What is a Bess & how does it work?

A BESS is designed for energy management, providing stored energy over longer periods. It can be used to store excess energy generated from renewable sources (like solar or wind) and supply power during peak demand or when the primary power source is unavailable. Components:

## BESS Uninterruptible Power Supply in Columbia
