Overview

What types of batteries can I mail or ship internationally?

There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.

Are wet batteries safe to ship internationally?

Like lithium batteries, there are strict regulations to follow when shipping wet batteries internationally. An IATA Dangerous Goods label must be attached, along with the correct UN number and shipping name for the particular type of batteries.

Can You ship lithium hydride batteries internationally?

While not as strictly regulated as lithium batteries, there are still guidelines to follow when shipping dry cell and nickel-metal hydride batteries internationally. The safest way to ship batteries is within the device they power. Ensure terminals are protected (e.g., with tape or caps) and pack the device to prevent accidental activation.

Why are solar panels so expensive to ship?

1. High Shipping Costs & Carrier Volatility Solar panels, inverters, and battery systems are often large, fragile, and expensive to ship. Poorly optimized freight solutions can increase costs by 15-25% per shipment. Many companies struggle with LTL (Less-than-Truckload) & FTL (Full-Truckload) pricing, causing unpredictable shipping expenses.
