

Battery cabinet manufacturers division of labor

Overview

Who makes lead-acid batteries in the Uyghur region?

Since 2017, the government has licensed five lead-acid battery manufactures to smelt lead and produce batteries in the Uyghur Region. The largest of these, Camel Group, has faced sanctions for “frequent blood lead incidents.”.

Are CATL & Gotion high-tech forced labor?

The Wall Street Journal reported on June 6 that a group of US Republican lawmakers have called on the Department of Homeland Security to immediately add CATL and Gotion High-Tech to the so-called entity list, a US trade restriction tool, alleging that their supply chains use forced labor.

Will CATL build a battery plant in 2026?

In February last year, CATL and Ford Motor announced they would jointly invest USD3.5 billion to build a battery plant that would use CATL’s technologies, with production expected to start in 2026. But media reports say the project has run into setbacks. Most CATL products exported to the US are energy storage batteries.

Will CATL's energy storage batteries go out of business?

But media reports say the project has run into setbacks. Most CATL products exported to the US are energy storage batteries. But according to a report published at the end of last year, US electric power firm Duke Energy will gradually stop using CATL’s energy storage batteries under pressure from the US Congress.
