Overview

What is a battery cabinet?

A battery cabinet is a particular type of storage cabinet that reduces the risks associated with lithium-ion batteries. These innovative cabinets create a safer environment in which workplaces can charge and store their li-ion cells.

What are labtron lithium ion battery storage cabinets?

Labtron Lithium Ion Battery Storage Cabinets are engineered for secure storage and controlled battery charging environments. These cabinets feature self-closing, oil-damped doors and triple hinges for maximum structural endurance. They are constructed with a powder-coated steel body and integrated leak-proof sump for safe containment.

What are the parts of a battery storage cabinet?

Let's look at the most common parts: Frame – it forms the outer structure. In most cases, you will mount or weld various panels on the structure. The battery storage cabinet may have top, bottom, and side panels. Door – allows you to access the battery box enclosure. You can use hinges to attach the door to the enclosure structure.

What should a battery cabinet have?

Insulation system – insulation is also a safety measure a battery cabinet should have. Grille – it allows for free air flow thereby ensuring efficient cooling. Dual-stage venting system – It is a common technology in electric vehicle battery systems. The first stage will prevent water ingress and equalize pressure.
