Overview

What is Energy Storage Summit Germany?

Meet the right people, in the right setting. Energy Storage Summit Germany brings together senior decision-makers from across the value chain—including financiers, developers, TSOs, IPPs, traders, and policymakers. With curated investor-developer networking, daily roundtables, this is your chance to forge partnerships and unlock opportunities.

Do you need to store solar power?

When power is drawn from the electrical grid at a flat rate, there is no need to store that solar power. Storing excessive thermal energy to be used in colder times is one of the oldest forms of energy storage known to us. Recent research and development have made it possible to use this energy for grid applications.

What is energy storage Forum?

We are Europe's first conference dedicated solely to energy storage since 2010. All of our Forum's culminate with the unique Building the Action Plan feature. Join us for this session and take back an action list to the workplace.

Why is energy storage a problem in the EU?

Energy storage suffers from lack of regulatory certainty within the EU. While a number of member states - Germany and the UK especially - have made great strides in adoption levels, lack of consistency is a looming issue.
