

# **Bissaudi Energy Storage Power Station**

## Overview

---

Is Saudi Arabia a leader in battery energy storage?

Riyadh, February 14, 2025, SPA -- The Kingdom of Saudi Arabia has achieved a leading position among the top ten global markets in the field of battery energy storage, coinciding with the launch of the Bisha Project, which has a capacity of 2000 MWh and is one of the largest energy storage projects in the Middle East and Africa.

Is a 2gwh battery energy storage system being built in Saudi Arabia?

Battery storage containers at the Bisha project. Image: PowerChina. A 2GWh battery energy storage system (BESS) project has gone into operation in Saudi Arabia, according to the engineering, procurement and construction (EPC) firm which delivered it.

Why is Saudi Arabia launching a battery storage project?

Saudi Arabia aims to generate 50% of its electricity from renewables by 2030. However, renewable energy sources like solar and wind can be unpredictable. The 12.5 GWh battery storage project will solve this issue by storing energy and ensuring a steady power supply. This is very important in Saudi Arabia.

What is Bisha battery energy storage?

The facility is currently the largest operational single-phase energy storage project in the world. The Bisha battery energy storage system consists of 122 pre-assembled units, each equipped with a 6 MW power conversion system and four lithium iron phosphate (LFP) battery modules, with each module capable of storing 5.365 MWh of energy.
