

Blown fuse in circuit breaker in Toronto

Overview

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:.

What happens if a fuse blows?

Fire hazards, broken equipment, and lost power are some possible consequences of a blown fuse. When a fuse blows, your options are: Ensure you have a new fuse with the same breaking capacity, type, amperage, and rating. Following electrical safety practices are also an essential part of learning how to replace a blown fuse.

Can a professional electrician fix a blown fuse in Your House?

Fixing a blown fuse in your house can be a dangerous affair. A professional electrician can fix your electric issues and bring light back to your home safely. McCarrick Electric has provided Colorado residents with reliable electrical services and advice for over 40 years. We can help you figure out what to do when you blow a fuse in your house.

How do you fix a blown fuse?

Turn off all lights and unplug a few appliances in the room or rooms that have lost power. If you leave everything on and you've overloaded the circuit, it's possible to have the same blown fuse or breaker in your house all over again once you restore power! Locate and open your electrical panel.
