Overview

What is a solar off grid inverter?

Solar off grid inverter also gives the owner an option to monitor the functionality of the whole system. Besides, inverters can act as power output maximizers: they track the voltage of panels and identify the optimum operational power for the whole array. How is an off-grid inverter different from a grid-tied inverter?

.

Should I buy an off grid inverter?

When purchasing an off grid inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it. Consult with the manufacturer when in doubt and read the guidelines.

Can you use a grid-tie inverter for an off-grid solar PV system?

You can't use a grid-tie inverter for an off-grid solar PV system. It can easily damage the whole system and here is why. Grid tied inverters have a control device to match the inverter cycles with the utility grid cycles. They need to be in phase, otherwise the voltages will cancel each other out.
