

Brussels policy on new energy and energy storage

Overview

What is Belgium's energy policy?

With the publication of the Belgian Federal, Flemish, and Walloon government agreements, Belgium's energy policy has taken shape, emphasising pragmatism, energy security, industrial competitiveness, and a clear return to nuclear power.

What is Belgium's national energy & climate plan 2021-2030?

Belgium's National Energy and Climate Plan (2021-2030) is Belgium's commitment to achieve the 2030 European Union energy goals. The National Energy and Climate Plan (NECP) was mandated by the European Union to each of its member states. These plans cover a ten years period, from 2021 to 2030.

When did Brussels adopt an Air-Climate-Energy Plan?

Brussels adopted an air-climate-energy plan in April 2023. The regional energy and climate plans take account of the EU energy and climate legislation under the 'fit for 55' package, and constitute the regions' contribution to the Belgian NECP.

How will nuclear energy affect Belgium's future energy policy?

Contrary to previous policies, nuclear energy will play a crucial role in Belgium's future energy policy. The government has announced a program to revive Belgium's nuclear industry and repeal all provisions related to the nuclear phase-out and the ban on new capacity construction.
