

Bt20 battery cabinet parameters

Overview

What is a topdon BT20 battery tester?

TOPDON's BT20 is an entry-level wireless 12V battery tester. Equipped with a full range of features. Taking the BT series to a new level, it offers high-precision voltage detection and real-time voltage monitoring. This device lets users of all skill level, view voltage waveform graphs and test reports through an app.

What batteries can be used with BT-20?

When a fresh battery is loaded, the battery meter will automatically detect and tell its battery level. BT-20 is compatible with almost any flat top (without protection cap) Li-ion 21700, 20700 batteries. With an adapter (Available in Add-ons), you can also use the smaller 18650 batteries.

What is a BT20 battery test?

The BT20 uses the load test method for more accurate test results. It is suitable for 12V lead-acid batteries and supports a testing range of 5-20V. It can quickly measure the battery's charging or cranking performance, and run voltage tests (load & no-load).

How do I install the BT20 battery tester?

Soon after the battery tester is powered on, the real-time voltage App Downloading and Installation of the battery will be displayed on the screen, and the Bluetooth Search "BT20" in the App Store™ or Google Play™, download, icon will flash. and install it to your mobile device. Page 8 1. Only one tester can be connected to the App at a time.
