

# **Budget Scheme for Waterproof Energy Storage Containers**

## Overview

---

Which energy storage projects are eligible?

It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities. Eligible costs include civil works, storage systems, auxiliary equipment and systems and related expenses.

How much money is available for energy storage projects?

A total of €700 million (US\$800 million) is available in the form of capex grants. It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities.

What is a containerized battery energy storage system?

Let's dive in! What are containerized BESS?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

## Budget Scheme for Waterproof Energy Storage Containers
