

# **Bulk Procurement of Three-Phase Mobile Energy Storage Containers for Rural Use**

## Overview

---

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Does mobile energy storage reduce operational costs in virtual power plant dispatch operations?

The empirical results indicate that incorporating mobile energy storage into virtual power plant dispatch operations leads to reductions in operational costs for the local energy community, driven mainly by enhanced economic efficiency.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
