Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.).

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Which battery bank should I choose for the Instant off-grid containers?
