

Cairo solar tiles

Overview

This investigates the efficiency of using piezoelectric tiles to generate enough electricity to supply public facilities such as the metro station in Rod El-Farag which is a core urban area in Cairo. The results.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.
