

Cambodia solar panels solar energy

Overview

Does Cambodia have solar power?

Solar power capacity has been on a sharp ascent in Cambodia recently, increasing at a 10% annual rate from less than 1% of national generation capacity, however. Some 400-MW of solar-fueled power capacity is now connected to the national grid, according to the Department of Mines and Energy.

Will solar power boost Cambodia's energy share?

Phnom Penh, Cambodia — Cambodia is on track to significantly boost its solar energy share, with new figures projecting solar to make up 7% of the country's electricity supply by 2025. This equates to a total installed capacity of 530.14 megawatts (MW) —a major leap from 3.2% in 2023 and 4.6% in 2024.

Why are solar panels becoming a trend in Cambodia?

For decades, Cambodia's high economic growth has been fueled by strong garment exports, supported by tourism. However, a new trend in the country's exports has emerged in the past two years - a sharp increase in electrical and electronics (E&E) manufacturing products, particularly solar panels.

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.
