

# Can three solar container lithium battery packs in Rotterdam the Netherlands be used in parallel

## Overview

---

What are the transport rules for lithium-ion batteries in the Netherlands?

The following rules apply to the transport of lithium-ion batteries within the Netherlands: ADR: ADR (Accord européen relatif au transport international des marchandises dangereuses par route): Transport must comply with this European regulation, with specific requirements for packaging, labeling, and documentation.

Why is SK TES launching a new battery recycling facility in Rotterdam?

The newly established Rotterdam facility signifies a significant investment in meeting the needs of the electric vehicle (EV) and battery production markets. September 9, 2024, Rotterdam, NL. – SK Tes, a global leader in battery recycling solutions, is proud to announce the opening of its state-of-the-art battery recycling facility in Rotterdam.

Could SK TES be Europe's largest battery recycling facility?

The SK tes project is a prime example, potentially becoming Europe's largest facility for recycling electric vehicle batteries.” Holberg concludes: “SK tes is committed to closing the loop on lithium battery production through reuse and improved material recovery.

When can lithium-ion batteries be stored?

When the storage of lithium-ion batteries exceeds 10,000 kg, it falls under the Decree on External Safety Establishments (Bevi). Although the PGS 37 directive provides specific regulations for the storage of lithium-ion batteries, Bevi remains applicable for large quantities of storage.
