

Canberra solar container communication station Supercapacitor Project

Overview

What is the Canberra deep space communication complex?

We manage and operate one of NASA's three tracking stations that provide continuous, two-way radio contact with spacecraft exploring our Solar System and beyond. Located at Tidbinbilla, just outside Australia's capital city, the Canberra Deep Space Communication Complex is one of three Deep Space Network stations around the world.

How many antennas are there at Canberra Space Station?

There are currently four antennas operating at the Canberra station: one 70-metre and three 34-metre radio dishes that receive data from, and transmit commands to, spacecraft on deep space missions. At 70-metres in diameter and the height of a 22-storey building, Deep Space Station 43 is the largest antenna in the southern hemisphere.

Why is Canberra getting a new antenna?

NASA's Deep Space Network just marked 60 years of interstellar communication with a groundbreaking new antenna in Canberra. As a crucial hub in the global network that talks to spacecraft across the solar system, Canberra is getting a high-tech upgrade to handle more data from future missions.

How big is Canberra's New Deep Space Station 33?

Canberra's newest addition, Deep Space Station 33, will be a 112-foot-wide (34-meter-wide) multifrequency beam-waveguide antenna.

About Canberra Deep Space Communication Complex

Jul 24, 2025 · About Canberra Deep Space Communication Complex We manage and operate one of NASA's three tracking stations that provide continuous, two-way radio contact with ...

A Gigantic New NASA Dish in Australia Is Set to Transform ...

Apr 10, 2025 · NASA's Deep Space Network just marked 60 years of interstellar communication with a groundbreaking new antenna in Canberra. As a crucial hub in the global network that ...

Canberra celebrates 60-year NASA collaboration with new dish

Apr 10, 2025 · These two achievements are considered major milestones for the network, which communicates with spacecraft all over the solar system using giant dish antennas located at ...

Canberra Solar Energy Storage Power Station A Game ...

SunContainer Innovations - As the world shifts toward renewable energy, the Canberra Solar Energy Storage Power Station stands out as a model for integrating solar power with ...

Engineering:Canberra Deep Space Communication Complex

Jul 20, 2024 · The Canberra Deep Space Communication Complex (CDSCC) is a satellite communication station, part of the Deep Space Network of NASA's Jet Propulsion Laboratory ...

CDSCC Solar Energy Project Update

Nov 15, 2025 · A solar power project for the Canberra Deep Space Communication Complex (CDSCC) at Tidbinbilla in the ACT appears to be (very slowly) moving ahead. The CDSCC is a ...

About Canberra Deep Space Communication Complex

Tracking Spacecraft with Canberra Deep Space Communication Complex
Research with Canberra Deep Space Communication Complex
Fast Facts About Canberra Deep Space Communication Complex
The Complex is a NASA facility managed by CSIRO on behalf of the Australian Government; it operates through a government-to-government, treaty-level agreement. Activities of the Deep Space Network are coordinated by NASA's Jet Propulsion Laboratory in California. The Canberra station was officially opened on 19 March 1965; it was then known as the Tidb...
The Complex is a NASA facility managed by CSIRO on behalf of the Australian Government; it operates through a government-to-government, treaty-level agreement. Activities of the Deep Space Network are coordinated by NASA's Jet Propulsion Laboratory in California. The Canberra station was officially opened on 19 March 1965; it was then known as the Tidbinbilla Deep Space Instrumentation Facility. Tidbinbilla was chosen as the location for the Australian facility because it is close to the capital Canberra, and hills shield the site from radio-frequency interference. See more
New content will be added above the current area of focus upon selection
See more on csiro ProactiveAustralia to host next-generation deep space ...
Apr 11, 2025 · Australia's key role in global space exploration has been reaffirmed with the construction starting on a new, state-of-the-art ...

CDSCC Solar Energy Project Update

Nov 15, 2025 · A solar power project for the Canberra Deep Space Communication Complex (CDSCC) at Tidbinbilla in the ACT appears to ...

A Gigantic New NASA Dish in Australia Is Set ...

Apr 10, 2025 · NASA's Deep Space Network just marked 60 years of interstellar communication with a groundbreaking new antenna in ...

Canberra celebrates 60-year NASA ...

Apr 10, 2025 · These two achievements are considered major milestones for the network, which communicates with spacecraft all over the solar ...

DSS33 Antenna Canberra Deep Space Communication ...

Sep 29, 2023 · DSS33 Antenna Canberra Deep Space Communication Complex Project managed by Raytheon Australia in conjunction with CSIRO on behalf of NASA and the Jet ...

NASA's Deep Space Network Starts New Dish, ...

Apr 8, 2025 · The pair of achievements are major milestones for the network, which communicates with spacecraft all over the solar system using giant ...

NASA's Deep Space Network Starts New Dish, Marks 60 ...

Apr 8, 2025 · The pair of achievements are major milestones for the network, which communicates with spacecraft all over the solar system using giant dish antennas located at ...

Australia to host next-generation deep space antenna as Canberra ...

Apr 11, 2025 · Australia's key role in global space exploration has been reaffirmed with the construction starting on a new, state-of-the-art antenna at NASA's Deep Space Network ...
