

Canberra solar panels generate a lot of electricity

Overview

How many solar panels are installed in Canberra?

Over 11,281 small-scale systems have been installed in Canberra, ACT with a collective capacity of 10,631 kW. Around one in ten households in Canberra, ACT, generates solar power through rooftop installations, contributing to the territory's goal of reaching and maintaining 100% renewable energy.

How much energy does a solar system save in Canberra?

In Canberra, the savings from installing a solar system depend on its size and your energy consumption. Here's a breakdown of potential savings for different system sizes: Estimated annual output: Approximately 6,643 kWh.

Is Canberra a good place to invest in solar energy?

Yes! Canberra is one of the best Australian states to invest in solar energy, mainly because it receives one of the longest daylight hours. On average, Canberra receives around 8 sunlight hours each day. Even though Solar panels do work on cloudy days, sunny days are the best, and Canberra gets plenty of them.

How much power does a 10kW Solar System produce in Canberra?

A 10kW solar system in Canberra will produce 38.4kWh per day on average. This is enough power to run a very large home. The table below shows Canberra's average daily output of different solar power systems. These calculations are based on the Clean Energy Council's GC Design guidelines.
