

Cape Town wind and solar integration

Overview

When will solar PV & wind projects be operational in South Africa?

The solar PV and Wind projects are expected to be operational end of 2026. They are being developed by a consortium of TotalEnergies Renewables South Africa (33.5%), its partner Mulilo (15.5%) and Reatile Group (51%). TotalEnergies has been present in South Africa since 1954, when it started distributing petroleum products.

Is Cape Town a good place to get wind power?

Cape Town and its surroundings enjoy strong wind, which can serve as wind power. This led to the development of some big-name projects that are already up and running, with more on the horizon. Sere Wind Farm on the West Coast is the most discussed project. It's attracted so much attention because it's part of the national renewable energy program.

How much solar power does the Western Cape have in 2025?

Assessment, 2025 (Eskom, 2023) According to Eskom's latest grid survey, the Western Cape currently has 465 MW of large-scale PV and 98 MW of wind power installed. In the near term, 353 MW of solar and 840 MW of wind PV projects have secured grid capacity and are expected to.

What are some examples of wind power projects in South Africa?

Another notable example is the Darling Wind Power Project, located in the northern part of Cape Town. It is the first of its kind in South Africa and has paved the way for future wind farms. As tempting as it is to say the wind project is all about reducing emissions and maintaining a safe ecosystem, it is much more than that.
