

# Central Asia Power Base Station Power Supply

## Overview

---

Are Central Asian countries' power systems now isolated?

Central Asian Countries' Power Systems Are Now Isolated, But Not Everyone Is Happy!\* The Central Asian Power System (CAPS) was established in the 1960s and 1970s. The system consisted of mainly 30 percent hydro power plants (HPP) of Central Asian upstream and 70 percent thermal power plants (TPP) of downstream countries.

What percentage of caps electricity is generated in Central Asia?

Fifty-one percent of total CAPS electricity was generated in Uzbekistan, 13.8 percent in Kyrgyzstan, 9.1 percent in Kazakhstan, 15 percent in Tajikistan, and 10 percent in Turkmenistan. [ii] Having gained independence Central Asian governments started pursuing what they call "independent," which over time turned into "isolationist" energy policies.

How will Tajikistan's energy system be connected to Central Asian UES?

The ADB supported project to connect the energy system of the Republic of Tajikistan to the Central Asian UES is being implemented and is expected to be completed in 2024, which will allow the energy system to exchange electricity in parallel mode.

What is Kazakhstan's electric power grid?

Kazakhstan's electric power grids were designed to operate in parallel with both Russian and the unified Central Asian electric power systems.
