

China distribution switchgear in Gabon

Overview

What is a switchgear used for?

It includes in one unit two switches that can connect the load to either or both main conductors, and a fusible switch or circuit breaker and switch that feed a distribution transformer. This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts.

What products does Gaobo offer?

Discover Gaobo's customized solutions, including PLC control cabinets, high voltage cabinets, low voltage cabinets, and switch electric cabinets. Reliable, quality-assured products trusted worldwide.

What type of switchgear is used to isolate a transformer?

This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts. Ring main units can be characterized by their type of insulation: air, oil or gas. The switch used to isolate the transformer can be a fusible switch, or maybe a circuit breaker using vacuum or gas-insulated interrupters.
