

Collaboration on a 15MWh Mobile Energy Storage Container for Wastewater Treatment Plants

Overview

What is a Biocell water containerised wastewater treatment plant?

Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment system solution for any site, without the need for any existing infrastructure. Containerized mobile treatment systems are ready to use immediately on delivery and cater from 60 persons to 20,000 persons capacity.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerised mobile sewage treatment system?

Containerized mobile treatment systems are ready to use immediately on delivery and cater from 60 persons to 20,000 persons capacity. A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

Containerized Waste Water Treatment Typical Applications For Containerized Sewage Treatment Biocell Containerized STP Capacities and Approvals How Do Containerized Stps Treat Wastewater? Advantages of Conatinerized and Temporary Wastewater Treatment How to Buy A Containerized WWTP For small scale commercial wastewater treatment applications, we preinstall all treatment modules (processes) inside a single container. The complete treatment process including primary settlement, secondary treatment and clarification happens within the container. This type of packaged plant is ideal for temporary and mobile sewage treatment.
