

Compact power station factory in London

Overview

Will DP World London Gateway have a micro power plant?

A micro modular nuclear plant is planned for DP World London Gateway. PA A micro power plant is to be established at the DP World London Gateway port as part of UK plans to turbocharge the country's nuclear industry.

What's new at Battersea Power Station?

The Grade II* listed Battersea Power Station, one of London's major landmarks, has been transformed for the 21st century. The refurbishment carefully balances old and new, preserving the building's scale and visual drama with features such as the vast six-story atrium and open, unobstructed turbine halls.

Who designed WilkinsonEyre Battersea Power Station?

Sebastien Ricard, Director at WilkinsonEyre Battersea Power Station, designed by the renowned Sir Giles Gilbert Scott, first began operations in 1933. This monumental structure quickly became a vital energy source for London, supplying a fifth of the city's electricity and powering landmarks like Buckingham Palace and the Houses of Parliament.

What is Battersea Power Station restoration?

The restoration of Battersea Power Station extends far beyond the building itself, creating a cohesive urban environment that reintegrates the site into London's bustling fabric.
