

# Construction of a large-scale energy storage project in Milan Italy

## Overview

---

Why is CIP launching large-scale battery projects in Italy?

The development of large-scale battery projects aligns with CIP's growing focus on energy storage. With Italy's supportive regulatory environment, the partnership aims to leverage CIP's expertise to advance its storage infrastructure projects. The move also supports Italy's aim to meet the nation's 2030 renewable energy targets.

Can Italy make battery storage projects commercially attractive?

"Italy has a clear need for storage, and the enabling market and regulatory mechanisms are being put in place to make battery storage projects commercially attractive." CIP's Flagship Fund CI V, completed in March 2025, exceeded its €12bn (\$12.9bn) target.

Which projects have been submitted to the Italian Ministry of energy?

The 111MW project in Lombardia and the 97MW project in Puglia have been submitted to the Italian Ministry of Energy for approval. The 187MW project in Piemonte will be submitted for approval later this year.

Is MACSE a business case for grid-scale storage in Italy?

The CM and a new energy storage-only auction scheme called MACSE are set to form the bedrock of the business case for grid-scale storage in Italy, something that consultancy Timera Energy's director for power market services Steven Coppack said made it unique in Europe (Premium access).
