

Conventional solar panels on roof

Overview

What is a solar panel roof?

When we talk about solar panel roofs, we usually picture traditional solar panels mounted on the roof, capturing sunlight through photovoltaic cells and converting it into electricity. However, there's also another option: solar roof tiles also called solar shingles.

Can solar panels be installed on a commercial roof?

If you're considering installing a residential or commercial solar panel system, you might wonder if your roof type is appropriate for a solar installation. The good news is that solar panels can be installed on just about any roof type, but the installation process and mounting hardware might vary from material to material.

What are in-roof solar panels?

In-roof solar panels, also known as integrated solar panels, are solar panels that are installed directly into the roof structure instead of being mounted on top. They replace the roofing material itself and sit flush with the roofline, providing a seamless aesthetic that traditional solar panels do not. Are in-roof solar panels as efficient?

.

What are solar shingles?

Also known as solar roofs, solar tiles, or solar roof tiles, solar shingles are tile-shaped panels permanently installed on your home's roof. They have the appearance of traditional roof tiles, just like traditional solar panels, solar shingles are equipped with photovoltaic (PV) cells that capture sunlight and convert it into electricity.
