

# **Current Status of Hybrid Energy for solar container communication stations in Slovakia**

## Overview

---

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

How many residential PV systems were installed in Slovakia in 2024?

This means that over 1,000 residential PV systems put into operation in Slovakia in 2024 could have been equipped with a BESS, resulting in a total additional storage capacity of nearly 7,200 kWh for this category of sources.

How has solar technology changed in Slovakia?

For the second consecutive year, Slovakia has witnessed notable acceleration in the solar PV sector. This growth has been primarily driven by the declining cost of solar technology, coupled with relatively high energy prices faced by businesses, which has increased interest in PV systems.

What is the share of RES-E in Slovakia's electricity generation?

As of the end of 2024, the share of RES-E in Slovakia's electricity generation increased by a percentage point compared to the previous year, reaching 24.2%. Hydropower continues to lead, comprising 66% of the total installed renewable capacity, followed by solar PV at 29% and bioenergy at 5%.
