

Customized Folding Container for Farms Grid-connected Type

Overview

What is container farming?

Container farming is a vertical farming system that uses modified shipping containers for growing food inside without the need for power, water, sunlight or nutrients. Essentially, the container protects a controlled environment that is ideal for growing crops, providing a solution for sustainable agriculture in small spaces.

What is a shipping container farm?

Capitalizing on global transportation standards, shipping containers have presented themselves as the ideal mobile farm. Container farms can be moved and stacked together to accommodate farm growth and expansion. Large enough to support the agriculture needs of hundreds of people, shipping container farms are available in 10', 20', and 40' lengths.

What is a grow solar container farm?

The Grow Solar shipping container farms make it possible to grow delicious food 365 days a year with thousands of high-value crops like lettuces, leafy greens, herbs, roots, edible flowers, and more in just 320 sq. ft. Grow Solar Container Farm complexes are designed for all aspects of the cultivation process.

How do container farms work?

Their spacious interiors offer a central walking path with growing areas at arm's length on each side. Container farms are tall enough to support vertical farming on multiple levels, and turnkey systems can include complete prep and harvesting facilities built-in.
