

# **Da5000w pure sine wave inverter**

## Overview

---

What is a pure sine wave inverter?

Ask a Specialist Introducing our Pure Sine Wave Inverter, a high-capacity and reliable power conversion solution that seamlessly transforms 24V or 48V DC power into clean, stable AC output at 220V, 230V, or 240V. With an impressive power rating of 5,000W, this inverter is designed to meet a variety of power demands.

What is a 5000 watt inverter?

**High Power Rating:** With a substantial power output of 5000W, this inverter can handle a wide range of devices and appliances, including power-hungry equipment. **Multiple Voltage Options:** The inverter provides flexibility with voltage options of 220V, 230V, and 240V, ensuring compatibility with various international standards and your specific needs.

How much does a swp5000-da\*\*-RC weigh?

Weight 10.8kg Remote control Models with the type number SWP5000-DA\*\*-RC are equipped and 48V models Other models These models are supplied with a control module which is connected to the inverter via a 2 meter Ion cable with an RJ12 connector. The module contains the on/ff switch and two status Ds. Module size: 61 x 102 mm. Other models.

Does a 12V inverter automatically disconnect a power supply?

An inverter with a 12v input, if voltage is lower than 10.5v or higher than 15v. will automatically disconnect the power supply for protection. An inverter with a 24v input, if voltage is lower than 20v or higher than 30v. will automatically disconnect the power supply for protection.
