

Dakar Energy Storage Power Generation Project

Overview

Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

When will a solar power plant be built in Senegal?

“This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system.” Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal’s national grid managed by SENELEC.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”

Dakar Energy Storage Power Generation Project

Senegal Launches Groundbreaking LNG-to-Power Initiative Off Dakar ...

Jul 21, 2025 · National utility Senelec partnered with Turkish energy firm Karpowership to begin generating electricity offshore Dakar using an innovative floating system. The project utilizes a ...

Senegal: EPC contract will see May start for solar, BESS ...

Apr 23, 2025 · The company confirmed recently that it signed an EPC with Voltalia and Entech "for the development of the energy generation and storage infrastructure of the NEA Kolda ...
