

# **Delivery time for an 80kWh solar container**

## Overview

---

Can heavy solar equipment be delivered in a shipping container?

Heavy solar equipment can't always be delivered in a standard shipping van or shipping container, it's at risk of being damaged during transit, and it needs to arrive onsite according to energy project timelines. Effective supply chain management requires top-notch renewable energy logistics.

Why do you need a solar container?

Deploy power in hours Perfect for remote locations, construction sites, events, and emergency response situations. Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere.

How much does a solar panel shipment weigh?

The exact weight and dimensions of a solar panel shipment varies widely across different models. Assuming a weight of around 50 lbs per commercial solar panel and a pallet that fits about 30 panels, a single pallet of solar panels could weigh upwards of 1500 lbs.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

## Delivery time for an 80kWh solar container
